

Introducing CrisisGo: Enhancing School Safety Together

Dear School Presidents, Principals, and Parish Preschool Administrators:

We are excited to introduce a powerful addition to our school's safety measures: CrisisGo, a comprehensive safety application designed to empower us in enhancing a secure and responsive environment for our students and staff.

Why CrisisGo Matters:

In today's rapidly evolving world, maintaining a safe learning environment is of paramount importance. CrisisGo provides us with a versatile toolset that enhances our ability to handle emergencies effectively. The app offers three key benefits:

•**Tip Reporting:** CrisisGo enables anonymous reporting of safety concerns or potential threats, fostering a culture of open communication while preserving confidentiality.

•**Faster Alert Notifications:** With CrisisGo, we can swiftly alert everyone about emergencies, be it natural disasters, medical incidents, or security issues, ensuring a prompt and coordinated response.

•**Sharing Information with First Responders:** CrisisGo bridges the communication gap between our school and first responders, equipping them with real-time information to expedite their actions in critical situations.

We are committed to providing the safest possible environment for our school community. The adoption of CrisisGo aligns with our dedication to proactive safety measures.

Look out for upcoming training sessions the week of October 9, 2023 and guidance on how to effectively use CrisisGo.

Let's work together to create a secure and vigilant learning environment.

Sincerely,

Brandon Rothkopf
Office of Risk Management
Archdiocese of St. Louis
