

The Beauty of Eve

understand the power and strength created within the female body

The Beauty of Eve is a powerful presentation about how wonderful and marvelous the design and function of the female body truly is. It helps women appreciate and advocate for their own gynecologic health. It empowers women to know how tracking their cycle can greatly benefit their health by identifying potential problems and how tracking can be a natural alternative to the birth control pill.

"Why didn't I know this years ago?"

Our clients say this time and time again. Surprised to learn their bodies are sending signals to tell them about their reproductive health, they wonder why they hadn't learned this in their teen years. Many, in fact, lament having spent years on artificial hormones and the negative impact it had on their bodies.
