

Building a Culture of Life

I can build a culture of life
Inside my community
It will not require strife
Only unity.

I can be a beacon
And spread knowledge to young and old
To teach about life's sacredness
A beauty to behold.

Education is the way
To learn about human living
To create a culture of life
Where all life is worth saving.

Through education
You'll understand that every human is blessed
There is sanctity in all
From conception to death.

By way of direct assistance
You can help those who do not recognize
That all life including theirs is sacred
And is beautiful in God's eyes.

To help others see
And to show myself as well
When giving help or knowledge
Human life can excel.

Spirituality is the relationship
Between God and mankind, though
By showing others spiritual strength
The culture of life will grow.

By learning about being strong spiritually
And knowing God is by your side
You'll see beauty in all humans
And feel happiness inside.

I can be a role model
By making myself spiritually strong
And showing how it has benefitted me
In hope that they may sing Jesus' song.

To build a culture of life
It will take education and learning
But through prayer and penance
A bonfire of love will be burning.

To preserve life across the globe
And show people the importance of life
They would see Christ in all humans
And lessen human strife.

To show what life truly means
Through assistance and spirituality
People can help others who need it
And preserve humanity.
